2023 Gordon Research Seminar on *Neutron Scattering*

Realizing a Greener Future Using Neutron Techniques

June 24th-25th

*Four Points Sheraton / Holiday Inn Express
1050 Schooner Drive, Ventura, CA, United States*

A photograph of a marina at sunset. The sky is filled with vibrant colors of orange, pink, and purple. Palm trees and the masts of many sailboats are silhouetted against the bright horizon. The water in the foreground is calm, reflecting the colors of the sky. A boat is visible in the lower-left corner.

The 2023 Neutron Scattering GRS will bring together early-career neutron scientists from different communities of soft and condensed matter with a wide range of scientific and technical expertise. A particular focus of the seminar will be the role of the neutron, as a powerful probe of multifunctional and sustainable materials, in addressing environmental societal challenges.

Conference Chair

Dalila Bounoua

Laboratoire Léon Brillouin (France)

Associated Gordon Research Conference

This GRS will be held in conjunction with the “Neutron Scattering” Gordon Research Conference (June 25th-30th). If interested in attending both meetings, please submit an application for the GRC in addition to your application to the GRS

GRS Speaker Abstract Deadline: any applicants who wish to be considered for an oral presentation should submit their application by ***March 19, 2023***
